NOS N2 & Chemical Drip-Tray's

Specification

NOS N2 & Chemical drip tray's serve the critical purpose of containing any potential liquid nitrogen spills that may occur during handling or transfer processes from tanks, hoses, pipe work, and connections

- Designed to contain liquid nitrogen spills
- Available in two sizes - small and large
- Each set includes a top tray for positioning units and a bottom tray to collect overflow or hose leaks (both filled with water for enhanced containment)
- Storage compartment for chain slings and cover plates
- Easy to prepare and operate
- Approved for offboard lift
- Requires minimal maintenance
